

A) THE STRATEGIC CONTEXT

1. Foreword by Co-Chairs of CPP Board

Councillor Grant Laing, Leader, Perth and Kinross Council

Lori Hughes, Acting Chief Executive, PKAVS/Third Sector Interface, Perth and Kinross

Perth and Kinross Community Planning Partnership has a unique and collective statutory duty. Its role is to identify and reduce stubborn social and economic inequalities across the area which nearly 150,000 people, from many different backgrounds, call home.

Since we published our last Community Plan in October 2017, the world has dramatically changed in ways we could not have foreseen back then. At the time of writing, the immediate effects of the pandemic have eased, but the longer term impact will be felt for years to come: on household incomes, on mental and physical health, on learning and skills, on employability. There have been additional impacts on particular vulnerable groups. The current cost of living crisis is further exacerbating the daily reality and worry of poverty for many within our communities. The climate emergency creates additional challenges for us all and will, if not tackled with creativity and courage, create further inequality.

Nevertheless COVID also shone a light on the strength of our partnership working. This was evidenced by how we overcame the challenges of supporting thousands of people across the huge geography of Perth and Kinross, mobilising hundreds of volunteers, supporting community organisations to deliver food and other essential supplies, distributing digital devices to ease isolation and learning loss, distributing crisis support funds to people and local businesses. We learned and forged new ways of working during this time which, alongside our long-established CPP relationships, we will carry forward into the future. The partners involved in Community Planning across Perth and Kinross are united in the commitments set out in this new Local Outcomes Improvement Plan. The CPP exists for no other purpose – it is built on strong foundations and well placed to tackle the challenges and changes which lie ahead.

2. Community Planning

Community planning in Perth and Kinross is about how we realise our ambition for our area to be the best place in Scotland **for everyone to live life well, free from poverty and inequality**. It is based on a shared understanding of what matters to individuals, families, neighbourhoods, wider localities and across our area as a whole. It is about what Perth and Kinross wants to become, with partners and communities collaboratively agreeing joint action to make change happen.

The Community Planning Partnership Board (CPP) leads this work through the Local Outcomes Improvement Plan (LOIP). It has the collective statutory duty to reduce inequalities in Perth and Kinross both in geographic areas and within communities of interest. It must make sure: that local community planning works effectively through our Local Action Partnerships which report to the Board; that communities have an active voice and role in shaping their future and the future of the places they live in; and that action happens at both grassroots and strategic level which makes a tangible difference to people's lives.

3. The Future Challenge

The Community Empowerment (Scotland) Act 2015 sets out key statutory duties and powers for the CPP. That's the legislative framework. What matters in practical terms is how the CPP responds over the next 12 months and beyond to tackle the significant socio-economic challenges we are facing now and will continue to face in the coming years. Perth and Kinross has always had pockets of inequality and deprivation, alongside more affluent areas. Our six major towns and rural localities have always had strong pride in their different and unique identities with many self-supporting community networks and initiatives in place. These came to the fore during COVID when communities acted to support the most vulnerable people amongst them. Perth city is emerging strongly as a vibrant contemporary city, with major cultural regeneration programmes underway, wider public infrastructure investment by the Council and a huge ambition from the Perth City Leadership Forum to make Perth one of the most sustainable and environmentally responsible cities in Scotland and beyond.

However the ongoing impact of the COVID pandemic, continued pressure on public finances, and wider national/global factors are radically re-shaping our future. Many people and families in Perth and Kinross are already severely impacted by the cost of living crisis. Mental health and wellbeing has been impacted by COVID, by the various losses people have suffered and by worries about the future. This is happening in our communities, right now.

The Community Planning Partnership exists to serve those communities and for no other purpose. Its leadership role has never been more important. The actions we take in the next 12 months and beyond are what will make the difference to our area and the people who live here for decades to come. The LOIP sets out how we will make that happen. It is not about 'business as usual' – the day to day work of local public services. It is about collective action – what the CPP can only achieve by working in partnership to make a real difference to people's lives.

And it is also about our willingness to make the right decisions about how our joint resources – money, skills, people, time and physical assets – are best used to target the most vulnerable people and communities within Perth and Kinross, alongside community wealth building – helping to unlock local skills and potential which can shape a positive future for Perth and Kinross despite the upcoming challenges. If everything is a priority, nothing is a priority.

4. The National Strategic Context

Alongside the Community Empowerment Act there are other key policy drivers for how we go about the business of Community Planning:

- **National Planning Framework 4** which requires spatial and community planning to support the Place Principle: ***a shared understanding of what that place is for and what it wants to become with partners and communities collaboratively agreeing joint actions.*** In practice this means aligning the priorities of local community planning partnerships, focused on reducing inequalities; and Local Place Plans, which set out spatial priorities within a locality.
- **20 Minute Neighbourhoods**: these are a newer priority set out in the current Programme for Government and NPF4, which focuses on spatial planning and local living. 20 minute neighbourhoods is a concept which aims to ensure that the key needs of a local community can be reached within twenty minutes of non-motorised transport.
- The ongoing **Local Governance Review** has highlighted many current examples of and opportunities for better devolved fiscal, functional and community powers. A Local Democracy Bill is expected to enshrine some of these principles in the future.
- National policy continues to focus on **facilitating community empowerment** in other ways. For example the Scottish Land Fund, which can provide up to 95% of the costs of purchasing assets for communities, will grow to £20m per year by 2026 and the Investing in Communities Fund supports measures to tackle poverty.

5. Our Vision and New Strategic Priorities

In 2017 the purpose of the Community Planning Partnership set out in the Local Outcome Improvement Plan 2017-2027 was “*creating a confident, ambitious and fairer Perth and Kinross, for all who live and work here.*” Since then we have reviewed our strategic priorities in light of the ongoing impact of COVID and new/emerging challenges, particularly the cost of living crisis and its impact on our communities and the growing climate emergency.

From 2020 onwards we carried out self-evaluation and community engagement, including a Community Planning Conference in April 2021 and a series of workshops over the summer of 2021 to shape new strategic priorities for the LOIP from 2022 onwards. Our revised ambition for our area to be the best place in Scotland **for everyone to live life well, free from poverty and inequality.**

Our new priorities focus on inequalities which are stubborn and require new collaborative approaches. COVID has exacerbated a number of these issues and helped shine a light on the impact they have on our communities. It has also helped us to develop new and innovative ways of working with our communities.

1. Reducing Poverty – child, food and fuel poverty are significant inequalities in Perth and Kinross and ones which have been increasingly highlighted during the COVID pandemic and its aftermath. Evidence across the area shows levels of poverty increasing and all CP partners have seen demands grow for services which support those needing financial assistance and advice. New community food initiatives have rapidly evolved in the last 2 years including new foodshares and foodbanks to support people struggling to meet the cost of living. With the energy price cap rising again in October 2022, partners need to consider additional support that can be provided for households across Perth and Kinross.

2. Physical and Mental Wellbeing have been negatively impacted through COVID and its aftermath. Evidence from the Health and Social Care Partnership shows a major increase in demand for mental wellbeing support, demanding a cohesive and strongly aligned response from all CP partners in future, alongside NHS Tayside and adult/child social work and social care services. The recent independent inquiry into mental health services in Tayside (The Strang Report) highlighted a breakdown of trust and a lack of respect between service users and service providers and within service providers themselves.

3. Digital Participation is increasingly important and has highlighted issues with connectivity, technology and individual capacity, again exacerbated or brought to light during the pandemic. Perth and Kinross Council has allocated additional funding for Digital Inclusion since 2021/22 and established a multi-agency Digital Participation Working Group

4. Skills, Learning and Development is a priority for those in formal education who were impacted during COVID, and through Community Learning and Development provision to support individuals and communities to build their skills, confidence and resilience. Ways of delivering learning have also evolved and changed and new support is under development for the increasing numbers of asylum seekers and refugees being welcomed to our area.

5. Employability is about an enhanced focus on upskilling for those seeking employment and supporting young people in a fast changing job market, enabling people to enter, sustain and progress in work. The CPP supports the Local Employability Partnership bringing key partners together to focus on this priority.

In addition to these five strategic priorities, the CPP has identified two **cross-cutting issues**. The Community Planning Partnership has established a **Climate Change** Working Group in response to national commitments and targets for a Just Transition towards reducing carbon emissions by 2030 and a net zero carbon Scotland by 2045. The remit of the Working Group is to address the specific inequalities which climate change brings and provide a forum for partners to collaborate on climate change related actions.

In 2019 the greenhouse gas emissions for Perth and Kinross (within scope of influence) were 926 ktCO₂e (kilo tonnes of CO₂ equivalent), which equates to a per capita emission of 6.1 tCO₂e (Scottish average 4.6 tCO₂e). This is a 30% reduction since 2005. In 2021, over 90% of residents surveyed reported noticing a changing climate. It is estimated there are 8,700 homes and businesses at risk of flooding in Perth and Kinross. This equates to 1 in 12 residential properties and 1 in 7 businesses. Climate change is expected to increase the number of properties and businesses at risk. Across Perth and Kinross, many of the areas at greatest risk of flooding are also some facing the highest levels of deprivation.

COVID, the global economic downturn and volatility in energy prices are all factors creating huge pressures on households, described as a **Cost of Living Crisis**. Current data suggests this may reduce an average family budget by as much as 50%, and an extra £65 a week will be needed by many households to maintain a decent standard of living. The CPP cannot control these factors, but it can take joint action to mitigate the impact on people and communities in Perth and Kinross. It can also work strategically to ensure the resources at its disposal – individual CP partner resources, access to national discretionary funds, and by using levers with the 3rd party organisations from which it contracts services, to ensure support to people and families who need it most is effectively targeted.

Part B of this Plan sets out the data and evidence we have drawn on to inform our new strategic priorities, and the actions we will take in year 1 of the LOIP as we face the future. How we use data and evidence will be critical for ensuring our collective resources are targeted in future at the right things, at the right time and in the right ways.

6. The Perth and Kinross Offer

The LOIP sets out **what** the CPP will do over the next 12 months and beyond to make Perth and Kinross a place where everyone can live life well. The Perth and Kinross Offer is about **how** we will work. It is an ethos to which the CPP is collectively signed up.

The Offer places people at the heart of everything we do and recognises that everyone has something to offer in shaping the future of Perth and Kinross. It builds on the community wealth of skills and commitment which already exists. It is our collective commitment to make sure local public services work hand-in-hand with the people and communities who rely on those services. It reflects the fact that communities have a wealth of skills, strengths and assets and are often better placed to identify the solutions to issues when they arise. And it reflects the CPP commitment to empowering frontline staff to ‘think yes’ and take the action they judge is needed to make positive change happen on a day-to-day basis.

B) OUR STORY OF PLACE

CONTEXT

The CPP and individual partners draw on a range of data and evidence sources to shape strategic plans and delivery; and to monitor progress and impact at area wide and locality level across Perth and Kinross. How we use data, evidence and wider community intelligence in future will be critical for understanding the priorities within the priorities.

Throughout the period of COVID lockdown official statistical collection changed focus to COVID related statistics, meaning that other indicative statistics have either not been collected at all, or are only now being collated. It is important to remember that in times of significant change, such as society has been experiencing since 2020, official statistics lag behind the situation and do not adequately track or describe the significance or impact of change.

Perth and Kinross Council is working on delivering Power BI as a central point for data analysis and presentation of quantitative data. This will be supplemented by a continued Stories of Place approach, which brings in lived experience and anecdotal evidence from our communities and officers, thereby presenting a more comprehensive picture of life in our communities.

Our area encompasses 1 city, 6 towns and over 100 smaller settlements of all sizes, and some of the UK's most diverse landscapes. The diversity of our landscape and our urban/rural mix can bring challenges as well as opportunities to redesign services at a regional and local level to meet the changing needs of our population.

KEY DEMOGRAPHICS

Overall breakdown

More recent information on population breakdown will not be available until the Census 2022 information is published. The National Records for Scotland (NRS) provide mid-year estimates for population size and breakdown. The table below shows the breakdown for Perth and Kinross in 2021.

Age Group (years)	P&K Total Population	P&K % of Population	Scotland % of Population
0 – 15	24218	16%	17%
16 – 24	13838	9%	10%
25 – 44	34950	23%	26%
45 – 64	43806	28%	27%
65 – 74	19705	13%	11%
75 and over	17293	11%	9%
All people	153810	-	-

Source NRS Mid-Year Population Estimates 2021

Population estimates show evidence that Perth and Kinross has an older population than Scotland as a whole. Comparisons to 2011 show that the number of 0-15 year olds in Perth and Kinross has declined by 3.5% (0.5% decline for Scotland as a whole) whilst the population aged 65 and over has increased by 48% (39% increase for Scotland as a whole). This will have implications in terms of service design and provision for the CPP and continues a trend of Perth and Kinross communities becoming increasingly older.

Ethnicity

In the 2011 Census, the following ethnic breakdown was given for Perth and Kinross:

- 81.8% identified as White Scottish (84% for Scotland)
- 11.3% identified as White Other British (7.9% for Scotland)
- 0.8% identified as White Irish (1% for Scotland)
- 1.7% identified as White Polish (1.2% for Scotland)
- 2.4% identified as White Other (2% for Scotland)
- 1.3% identified as Asian, Asian Scottish or Asian British (2.7% for Scotland)
- 0.8% identified as Other Ethnic Group (1.3% for Scotland)

This information highlights that Perth and Kinross has a larger proportion of white residents, but the mix between Scottish, other British, Irish and European is greater than for Scotland as a whole. We also know that Perth and Kinross has a significant number of residents of Eastern European origin. Whilst exact figures are not available, we know that around 11,500 applications have been made to the EU Settlement Scheme, with the largest number coming from Polish, Romanian and Bulgarian nationals. More recently increasing numbers of asylum seekers and refugees have been relocated to Perth and Kinross. This adds further to our cultural and ethnic mix and our services will need to respond proactively to ensure these individuals and families have access to the support they need across all of our strategic priorities.

Living Standards

ACORN data is used to understand life and living conditions, lifestyles, behaviours and attitudes and can therefore help inform the public service needs of neighbourhoods and households. The table below shows the distribution of households in Perth and Kinross across ACORN categories in 2021.

ACORN Category	Total Households	% of Households
Affluent Achievers – These are some of the most financially successful people in the UK. They live in wealthy, high status rural, semi-rural and suburban areas of the country.	21,572	31%
Rising Prosperity – These are generally younger, well educated, and mostly prosperous people living in our major towns and cities. Most are singles or couples, some yet to start a family, others with younger children. Often these are highly educated younger professionals moving up the career ladder.	2,728	4%

ACORN Category	Total Households	% of Households
Comfortable Communities – This category contains much of middle-of-the-road Britain, whether in the suburbs, smaller towns or the countryside. Most people are comfortably off. They may not be very wealthy, but they have few financial worries.	20,017	29%
Financially Stretched – Incomes tend to be well below average. Although some have reasonably well paid jobs more people are in lower paid administrative, clerical, semi-skilled and manual jobs. Overall, while many people in this category are just getting by with modest lifestyles a significant minority are experiencing some degree of financial pressure.	16,860	24%
Urban Adversity – This category contains the most deprived areas of large and small towns and cities. Household incomes are low, nearly always below the national average. These are the people who are finding life the hardest and experiencing the most difficult social and financial conditions.	7,783	11%

This information shows that whilst many people in Perth and Kinross manage well, over a third of households (36%) are financially stretched or facing considerable economic challenges. For example a quarter of households live in fuel poverty due to rurality and other factors. We know that there are pockets of severe poverty in Perth and Kinross, often cheek-by-jowl with more affluent communities. This can mask inequality, and potentially stigmatise it further. And we also know that the cost of living crisis, fuel and food costs and other challenges will impact on more people in the years to come. Poverty and inequality are increasing in our area, in common with all other parts of Scotland. All these factors make it particularly important for the CPP to use data and evidence systematically and consistently to make sure services and resources are targeted effectively to support the most vulnerable people and families across Perth and Kinross.

Levels of community satisfaction and engagement

People living in Perth and Kinross typically report higher levels of satisfaction with their community than the Scottish average: trust, everyday kindness within neighbourhoods which look out for each other, opportunities to socialise, and the extent to which communities mobilise and act together to tackle the things they regard as most important. Compared to the Scottish average, communities in Perth and Kinross also report having greater influence over decisions, and a desire to increase that influence further. However there are relatively few examples of community asset transfer (whereby local buildings or other assets are owned or managed and run by local people). These are all important factors for the CPP to consider in the future.

Crime and Perceptions of Crime

As of 2019 the percentage of adults in Perth and Kinross who feel safe when walking alone in their neighbourhood and in their home alone at night is above the average for Scotland. In the same year, the number of recorded crimes committed in Perth and Kinross declined by 22% compared to 2010/11 with a crime rate of 289 crimes

per 10,000 people (451 in Scotland). In addition, the crime rate per 10,000 people, reconviction rates and the number of reconvictions per offender are all below the national average. However, this does not mean those affected by crime and fear of crime are any less affected by its impact on their lives.

Violence against women, domestic abuse and hate crime

In 2020/21:

- 37% of domestic abuse incidents recorded by Police Scotland included at least one crime or offence. This compares to a national average of 40%.
- There were 89 recorded incidents of domestic abuse per 100,000 people in Perth and Kinross. The average across Scotland is 119.

In 2019/20, which is the most recent year for which hate crime data is available:

- 85 incidents were reported, increasing from 69 in 2018/19. This bucks the previous trend which saw incident numbers gradually declining from 2014-15 onwards.
- The number of incidents recorded is equivalent to 6 per 10,000 people in Perth and Kinross, compared to an average of 12 per 10,000 across Scotland.

It is crucial to remember that under-reporting is a factor: not all incidents of domestic abuse, violence against women or hate crime are reported to Police Scotland or other CPP partners. Whilst the data we have suggests these types of crimes are not significantly rising in our area, the CPP is carefully monitoring concerns and new-emerging data. CPP will consider more localised data and information during the course of 2022/23 and identify/follow through any new partnership action required.

OUR STRATEGIC PRIORITIES – DATA AND EVIDENCE LED

This section of the LOIP summarises the key information at area wide level which has informed our 5 new strategic priorities. The CPP will continue to gather, monitor and review data trends to reassess its priorities over the next 12 months.

1. Impact of COVID

During 2020/21 we carried out Community Impact Assessments which gave us these insights about how people and communities felt COVID had impacted their lives. 96% of respondents experienced negative impacts on their contact with family and friends and 95% experienced negative impacts on their mental health due to isolation or anxiety. In addition to this, 82% of respondents experienced negative impacts on their finances and 90% thought there had been a negative impact on education and childcare. These issues have implications for all of the strategic priorities that this LOIP focuses on and provides a reminder of the depth of some of the issues of inequality we are dealing with.

2. Poverty

The table below outlines the deprivation structure of Perth and Kinross using the Scottish Index of Multiple Deprivation (SIMD). SIMD takes a different approach to the ACORN data presented in the previous section, but both are useful indicators. The

SIMD ranks each datazone in Scotland by a number of factors: access, crime, education, employment, health, housing and income. Using these ranks, an overall deprivation rank is given to each datazone, splitting them into Deprivation Quintiles (Quintile 1 being the most deprived, and Quintile 5 the least). The majority of people living in the most deprived quintile are found in north/central Perth and in Rattray.

Percentage population living in the 2016 and 2020 SIMD Datazone Quintiles

Quintile	Percent of Pop (2016)	Percent of Pop (2020)	Difference
SIMD 1	5.4%	6.2%	0.7%
SIMD 2	11.3%	12.7%	1.3%
SIMD 3	23.8%	21.5%	-2.3%
SIMD 4	41.3%	36.6%	-4.7%
SIMD 5	18.1%	23.1%	4.9%

Poverty related statistics in P&K

1 in 5

Have no savings to fall back on

1 in 6

Earn below the Living Wage

1 in 3

In lower paid occupations

Living in or on the edge of poverty

Recent figures show the numbers of people claiming Universal Credit (UC) in Perth City was slightly higher than both the Perth & Kinross average and the Scottish average. Before lockdown, 3.1% of people living in Perth City were claiming UC but this rose to 6.4% by May 2020 which exceeded the Scottish average of 6.2% (*Department for Work & Pensions (DWP)*).

Children in poverty against total population of 0-16 year olds over time in Perth and Kinross

These child poverty statistics are pre-COVID-19 figures and are likely to underestimate the number of children currently affected by poverty across Perth & Kinross. The challenges facing some families are greater than others and we know that some families are more likely to be affected by poverty than others:

- In 2022 1 in 7 Perth and Kinross households are classified as being amongst the most socially and financially challenged in the UK
- Nearly 1 in 5 parents report a limiting long-term physical or mental health condition which is higher than for Scotland as a whole (1 in 6).
- 1 in 5 adults in Perth and Kinross have no savings to fall back on and 1 in 5 workers earn below the living wage
- Fuel poverty rates in Perth and Kinross are at 25% (17,000 households), slightly above the national average of 24.6% due to a mix of rurality, high levels of renting and having a low wage economy.
- There are also a significant number of older properties and properties in rural areas, which are not connected to the gas network. 48% of properties in Perth and Kinross are off the main gas grid, compared to 24% in Fife and 29% in Stirling. 12% of families in Perth and Kinross are living in houses where energy efficiency is poor.
- Anecdotal evidence from foodbanks and larders indicates that there is an ongoing and increasing level of use across the different facilities in Perth and Kinross. From March 2020 to March 2022 over 3,500 referrals were made to foodbanks and larders by Perth and Kinross Council. This does not include those who attended directly themselves, or were referred by another agency.

Percentage of people income deprived in areas of P&K compared to Scotland (2020)

Access deprivation in SIMD 2020 highlights datazones in Scotland which have the poorest access to key services, typically measured by travel time to those services. In Perth and Kinross, we have 37 datazones classed in the 10% most access deprived category in Scotland, including Rannoch and Aberfeldy, which is judged to be the most access deprived datazone in the whole of Scotland. These 37 datazones represent 31,993 people across Perth and Kinross, or 21% of our population and highlights the challenges of providing consistently high quality services across such a diverse region.

3. Physical and Mental Wellbeing

Perth and Kinross has generally similar health and wellbeing issues as those in Scotland as whole, but it is important to note that national figures may not compare favourably with other UK nations or other more-developed nations. The Health and Social Care Partnership and NHS Tayside draw on numerous data sources to drive priorities. Levels of life expectancy and mortality are better in Perth and Kinross than the national average and the incidences of hospitalisation with conditions such as coronary heart disease, chronic obstructive pulmonary disease and cancer are lower. However, the Scottish Household Survey indicates an increasing proportion of adults with a long-term physical or mental health condition, which at 42% is above the national figure of 30% (2018). The following statistics help to better understand the relative health of the population of Perth and Kinross:

- In 2020/21 alcohol-related admissions were 426.2 per 100,000, compared to a national average of 621.3. In 2015, the rate for P&K was 329.1 per 100,000.
- In 2020/21, 17.3% of the population were prescribed drugs for anxiety, depression or psychosis. The national average was 19.3% for the same period. In 2015, the rate was 15.8% in P&K. In line with this, P&K have ranked high on the anxiety measure in the ONS Headline estimates of personal well-being, sitting in the joint 5th rank in Scotland (2021).

Number of Mental Health attendances at A&E for P&K HSCP

Mental wellbeing and service provision in Tayside was subject to an independent inquiry, with the final report (The Strang Report) highlighting issues around trust and respect between and among service users and providers. The CPP will offer appropriate support to the Perth and Kinross Health and Social Care Partnership, who are leading on the P&K response to the report and its recommendations.

Reported feelings of Scottish rural communities

Source: RuralCOVIDLife Survey: Summary Report, Generation Scotland, January 2021

Two thirds of the population of Perth and Kinross live in rural areas or small towns outside Perth. The previous graph shows the results of a survey conducted by Generation Scotland in January 2021 which sought to identify issues around the mental wellbeing of people living in Scottish rural communities. Younger participants and female participants reported higher levels of loneliness, with slightly higher levels also seen in those living in remote rural locations. Strategic service provision and local projects can play a significant role in providing the support that best meets the needs of people experiencing loneliness and isolation.

4. Digital Participation

Lockdown periods during the Covid pandemic accelerated the shift towards if online services but some anecdotal evidence indicated barriers to accessing digital services and wider digital opportunities for people and communities. This suggested that there were a number of households across Perth and Kinross that lacked one of the three aspects of digital participation – connectivity, technology and capacity. Responsibility for digital connectivity rests with the UK and Scottish Governments, who are rolling out fibre and mobile networks across the UK at present. There is limited data on connectivity below national level, and it is believed that Perth and Kinross is likely to be similar to the national position, which shows that (2022 figures):

- 81.7% access the internet at least once a week
- 75% access the internet for at least 3 hours per week
- 36.7% have a mobile phone with internet access
- 35.3% have a tablet with access to the internet
- The most common online activities include accessing emails; social media; online banking; and purchasing goods.
- 16.5% have accessed local government services online.

13% of the population of Perth and Kinross live in datazones which have less than 50% of premises with access to super-fast broadband, compared to 23.3% across Scotland. Super-fast broadband is classed as at least 30Mb/s download speed. Superfast Broadband from fixed broadband in Perth and Kinross was available in 87.9% of all premises in the area, which ranks 25th out of all local authority areas in Scotland (2021/22). 78.9% of the geographical area of Perth and Kinross had 4G signal outdoors from at least one mobile network provider - this is one of the lowest levels of geographical coverage in Scotland.

These figures suggest that the issues first highlighted in lockdown may not be as stark as initially thought. Lacking specific local data, we do not know the actual situation. Therefore, in order to better understand current levels of digital participation in Perth and Kinross and the barriers and enablers to participation, the Council has commissioned research, which we expect to report in late summer 2022. This research will provide a baseline and information that can be broken down by geography and demography, as well as an Action Plan for the work that needs to be done to increase levels of digital participation in Perth and Kinross.

5. Skills, Learning and Development

In 2021, 5105 16-19 year olds in Perth and Kinross (93.6%) were participating positively in some form of education or employment. However the focus of the CPP must be need to ensure that services and support are well targeted to the 6.4% of our young people who are not in employment, education or training. It is important to note that positive participation varies from those from the most deprived communities (304 individuals, 85.9%) to the least deprived (1283 individuals, 95.7%).

Ongoing economic challenges and a continued focus on community empowerment mean that there is an even greater need for adult and community learning. The increasing numbers of asylum seekers and refugees in Perth and Kinross also needs to be reflected in our service offering, particularly around ESOL (English for Speakers of Other Languages) and other linked opportunities. During 2021/22 the Adult Learning Partnership has focused on the delivery of employability and digital skills with 279 adults achieving their learning outcomes, including 70 who improved their employability or digital skills. The Adult Learning Partnership will continue to develop its offer to ensure that there are clear progression pathways for learners, allowing them to move from entry level courses into more formal education, training or employment. The Partnership will work to provide learners with the skills, confidence and qualifications needed to secure employment and work with the Local Employability Partnership to develop integrated support. It is anticipated that demand for literacy, numeracy and ESOL provision will continue in 2022/23.

6. Employability

In December 2021 80.3% of residents in Perth and Kinross were classed as economically active. This figure has varied significantly over the last five years, with a low point of 75.2% during 2020/21 and a high of 85.7% in 2018/19. The figure for Perth and Kinross is consistently higher than the Scottish and UK average. Of those classed as inactive in Perth and Kinross in December 2021, 22.5% are retired, compared to a Scottish average of 15.3%.

Finding work is also becoming more difficult in some sectors, with 1 in every 8 households feeling the effects of worklessness (*Office of National Statistics*). Figures from 2021 suggest there are 2800 economically inactive people (15.8% of all economically inactive individuals) within Perth & Kinross who would like a job. However, the hospitality, tourism, care and agricultural sectors are all experiencing labour shortages and creating new employment opportunities.

In terms of occupation Perth and Kinross has a lower proportion of people employed in professional or managerial posts (41%) compared to the Scottish average (48.2%). There are higher proportions of people in Perth and Kinross employed in administrative or trades posts (23.2% compared to 18.9% for Scotland) and in labouring or factory related work (18.1% compared to 15.2% for Scotland).

The reliance on lower skilled work is reflected in gross weekly earnings. In December 2021 the average pay for an individual in Perth and Kinross was £574.90, compared to £622.00 for Scotland as a whole. 24,000 people are in lower paid work in Perth and Kinross and weekly earnings have been lower than the Scottish average for 8 out of the last 10 years.

2. Community Planning in Perth and Kinross

Community Planning Partnership Structure

Strategic Community Planning

The CPP Board provides strategic leadership and direction for community planning across Perth and Kinross. Each partner plays a wide role in improving the lives of citizens across Perth and Kinross, individually and collectively. The CPP Board scrutinises performance and delivery of the LOIP.

The CPP Executive Officer Group (CPPEOG) focuses on improving how partners work together to ensure that the CPP is Organised to Deliver the LOIP. There are four main elements to our Organised to Deliver approach:

- **Community participation and co-production of services** – involving service users in the design and delivery of services brings improved outcomes for communities.

- **Locality partnership working** – moving from a centralised model of service delivery, to one which is more reflective of local contexts delivers better services and improved outcomes for communities.
- **Data sharing** – evidence led service design and delivery produces better quality and more relevant services. Partners sharing appropriate data to inform decision making is necessary to achieve the best outcomes
- **Strategic Risk Management** – this is about how the CPP Board reviews barriers to progress in delivering the LOIP and the action/risk controls it puts in place to ensure delivery stays on track.

Local Community Planning

Perth and Kinross covers a wide geographic area with many distinct communities. We have divided the area into seven large localities, in order to better reflect local circumstances and allow partners to work effectively with communities to tackle their own unique challenges.

We have seven Local Action Partnerships (LAPs) across Perth and Kinross. The LAPs are responsible for developing a Locality Plan targeted on key inequalities, within the wider CPP strategic priorities. LAPs are made up of community representatives, local elected members and representatives from key services. The LAPs aim to ensure local communities can have significant influence over the services which are most important to them. Each has a small administrative budget, and since 2017/18 has played a key role in distributing the Council's Community Investment Fund. The LAPs will be reviewed as part of the wider governance review of the CPP in 2022/23. Separately but linked, the Council will be carrying out a Transformation Review of all the community engagement and empowerment function it supports, including the LAPs.

The CPP is committed to carrying out more targeted locality work in two areas of Perth and Kinross: Coupar Angus and South Crieff. Relevant actions are built into the LOIP Action Plan for 2022/23 onwards.

Other Partnerships

There are a large number of other statutory and non-statutory partnerships across Perth and Kinross. The key strategic and statutory partnerships are identified in the diagram above. They are responsible for discharging functions including adult and child protection; community justice and community safety and health and social care. Their links with the CPP are important for shaping, delivering and evaluating the impact of the LOIP.

3. Performance Management

Measuring performance is fundamental to understanding the impact that the CPP has and for driving continuous improvement within the CPP and individual CP partners. The LOIP incorporates a set of performance indicators which will be monitored and reported to the CPP Board, alongside a regular review of the strategic risk profile. We use the performance indicators set out in the Action Plan section of this document to measure our progress in delivering our strategic priorities. The National Performance Framework is the overarching framework within which we measure our local contribution to the National Outcomes.

C) OUR STRATEGIC PRIORITIES – AREA-WIDE ACTIONS

There are broader strategic actions that the CPP needs to take at a Perth and Kinross wide level, which will make a positive difference across the region. These are set out below, split into sections based on our five strategic priorities.

REDUCING POVERTY – YEAR 1

National Outcome	We tackle poverty by sharing opportunities, wealth and power more equally			
Local Outcome	Levels of poverty in Perth and Kinross will remain below the national average Action on food insecurity is better co-ordinated across Perth and Kinross Action on fuel poverty is better co-ordinated across Perth and Kinross Increasing numbers of premises are offering free period products across Perth and Kinross			
Year 1 Action	Who is the action carried out by?	Resources allocated	How impact will be assessed?	Timescale
1.1 Provide clear messages and communications about how to reduce priority debt and essential living expenses	Perth and Kinross Council (Welfare Rights) and PKAVS	Within existing resources	Benefit gains Financial Insecurity Fund Awards	March 2023
1.2 Promote and participate in Challenge Poverty Week through a programme of events	Perth and Kinross Association of Voluntary Services	Within existing resources	Measure learning gained by participants	October 2022
1.3 Establish a Cash First Partnership for Perth and Kinross	CPP Executive Officer Group	Potential external funding	Partnership established	December 2022
1.4 Research the use of entitlement cards to determine if they reduce the stigma of poverty	CPP Executive Officer Group	£100k Food Insecurity (22/23)	Recommendations presented to CPP Board	March 2023
1.5 Use procurement to promote the Living Wage among employers in Perth and Kinross	Child Poverty Working Group	Within existing resources	Increase in Living Wage employers	September 2023
1.6 Deliver a test of change project in three localities – delivering tailored support packages to priority families	Child Poverty Working Group	Within existing resources	Number of families supported	October 2023

National Outcome	We tackle poverty by sharing opportunities, wealth and power more equally			
Local Outcome	Levels of poverty in Perth and Kinross will remain below the national average Action on food insecurity is better co-ordinated across Perth and Kinross Action on fuel poverty is better co-ordinated across Perth and Kinross Increasing numbers of premises are offering free period products across Perth and Kinross			
Year 1 Action	Who is the action carried out by?	Resources allocated	How impact will be assessed?	Timescale
1.7 Target families to receive funding for nutritional meals and activities during school holiday periods.	Perth & Kinross Council (ECS) and Good Food Project	Within existing resources	Applications approved and evaluation feedback form families and partners.	September 2023
1.8 Investigate and trial integration of Holiday Hunger and Foodshare initiatives to offer consistent support– Fuelled for Fun.	Perth & Kinross Council (ECS and Communities) Foodshare Providers	£50k (22/23)	Number of joint initiatives developed. Evaluation and feedback from participants.	April 2023
1.9 Commission community food providers to deliver projects which reduce food waste	Perth and Kinross Council (Communities)	£100k Food Insecurity (22/23)	Number of families supported	September 2023
1.10 Pilot a food voucher scheme for families in need	3 rd Sector Foodshare Provider	£100k Food Insecurity (22/23)	Number of vouchers distributed	March 2023
1.11 Establish a Foodshare Network in Perth city to co-ordinate activity to address food insecurity	Giraffe, Letham4All and Perth & Kinross Council (Communities)	£100k Food Insecurity (22/23)	Network established and meeting	March 2023
1.12 Provide cooking on a budget classes for key demographics	Perth & Kinross Council Communities Cookit	£100k Food Insecurity (22/23)	Number of classes delivered Number of trainers trained	March 2023

National Outcome	We tackle poverty by sharing opportunities, wealth and power more equally			
Local Outcome	Levels of poverty in Perth and Kinross will remain below the national average Action on food insecurity is better co-ordinated across Perth and Kinross Action on fuel poverty is better co-ordinated across Perth and Kinross Increasing numbers of premises are offering free period products across Perth and Kinross			
Year 1 Action	Who is the action carried out by?	Resources allocated	How impact will be assessed?	Timescale
1.13 Revise and update Fuel Poverty Statement as part of Local Housing Strategy	Perth and Kinross Council (Communities)	Within existing resources	Statement with specific commitments produced	February 2023
1.14 Re-establish Fuel Poverty Steering Group, with appropriate CPP involvement	CPPEOG Perth and Kinross Council (Communities)	Within existing resources	Steering Group established, with clear role and remit	October 2022
1.15 Identify localities and key demographics most at risk of fuel poverty	Perth and Kinross Council (Communities)	Within existing resources	Benchmark developed for future assessment of progress	December 2022
1.16 Implement referral process for those receiving primary, secondary and community-based care to appropriate advisory services in order to maximize income	NHS Tayside Perth and Kinross Council (Welfare & Benefits) Home Energy Scotland	£30,000 (22/23) TRIC	<ul style="list-style-type: none"> • Number of referrals • Number of people engaging with advice and support services • Income generated benefits • Improved energy efficiency in the home • Reduction in re-admissions to GPs and acute 	March 2023
1.17 Plan and deliver a Cosy Spaces initiative in Perth and Kinross	Perth and Kinross Council (Communities) ALEOs, CPPEOG	TBC	Number of Cosy Spaces created Number of households attending	March 2023

National Outcome	We tackle poverty by sharing opportunities, wealth and power more equally			
Local Outcome	Levels of poverty in Perth and Kinross will remain below the national average Action on food insecurity is better co-ordinated across Perth and Kinross Action on fuel poverty is better co-ordinated across Perth and Kinross Increasing numbers of premises are offering free period products across Perth and Kinross			
Year 1 Action	Who is the action carried out by?	Resources allocated	How impact will be assessed?	Timescale
1.18 Develop a fuel poverty / cold home mobile phone app for front-line staff to connect households with advice services	NHS Tayside Tayside Regional Improvement Collaborative	£20,000 (22/23) TRIC	Number of referrals Number of downloads of the app Number of engagements with the app	October 2022
1.19 Research community renewable energy co-operative schemes elsewhere in UK and assess feasibility of implementing in Perth and Kinross	CPP Executive Officer Group	Within existing resources	Research and recommendations presented to CPP Board	September 2023
1.20 Support growth of local Energy Advice Services in communities across Perth and Kinross	Perth and Kinross Council (Communities) SCARF	Within existing resources	Number of local Energy Advice Services available in Perth & Kinross	March 2023
1.21 Extend support for property owners to access funding to improve energy efficiency and understand how to make the best use of the technology	Perth and Kinross Council (Communities)	£100,000 (22/23) and potentially thereafter	Number of property owners supported	October 2022
1.22 Work with public, private and third sector partners to increase the number of premises stocking free period products	Perth and Kinross Council (Communities) PKAVS	£114,000 (22/23) and £114,000 (23/24)	Number of premises stocking products Number of products ordered	September 2023

PERFORMANCE MANAGEMENT – REDUCING POVERTY

Performance Indicator	Source	Update Timescale	PK 2019	PK 2020	PK 2021	Scotland
% of children living in poverty	End Child Poverty Now	Annually	22.2%	22.2%		24%
% of population who are income deprived	Scottish Government	Annually		8.0% (12,046)		12%

Adult Learners achieving their outcomes	CCS	Quarterly				

OUR STRATEGIC PRIORITIES – LOCALITY PARTNERSHIP WORKING

Context

Community engagement, co-production and empowerment are increasingly important aspects of service design and delivery. There are a number of approaches to this, statutory and non-statutory, including Community Action Plans which have been developed through funding from the Perth & Kinross Rural LEADER programme, Locality Action Plans being delivered by our Local Action Partnerships and Local Place Plans, which bridge the gap between traditional community action planning and locality planning, which focusses on socio-economic inequalities and physical / spatial planning which focusses on the use of physical space in communities. Specific statutory duties delivered by CPP partners also often require elements of community engagement. This is a cluttered landscape and one we need to consider carefully when delivering work at a locality level and how and where we allocate CPP resources.

Accelerated Locality Working

One of our enabling actions is to strengthen our approach to integrated locality working and in October 2021 the CPP identified two localities where we will accelerate our approach, involving key partners and community organisations to deliver focused practical actions on the ground.

Both localities are facing similar issues, but context-led solutions are required which fit local circumstances. As a result of this locality focus the Community Planning Partnership is committed to:

1. Tackling local drivers of poverty through collaborative working
2. Working with community groups to ensure local assets are managed and run sustainably
3. Improving direct access to essential services to residents in both localities
4. Supporting community groups to work together on shared objectives

COUPAR ANGUS

Coupar Angus is an historic market town and the second largest settlement in the Strathmore Ward, with a population of 2,787 (2020 mid-year estimate). Coupar Angus is situated 13 miles north-east of Perth, along the A94 trunk road and 15 miles north-west of Dundee along the A923.

- Central Coupar Angus is within the most deprived decile¹ for **income deprivation** (SIMD 2020)
- Central Coupar Angus is within the most deprived decile for **employment deprivation** (SIMD 2020)
- In the more affluent datazone (North – East Coupar Angus) there is a disproportionate number of families claiming tax credits, which is an indicator for **low income households**.
- The **unemployment rate** in Coupar Angus over the last three years averages 8.67%. The highest level in Perth and Kinross is 13.67% in Perth City and the lowest 4% in Highland Perthshire
- Central and South-West Coupar Angus are within the most deprived and second most deprived deciles for **education deprivation** (SIMD 2020)
- Compared to the national average, people in Coupar Angus are more **access deprived** (SIMD 2020), meaning that they find it harder to physically access services. Poorer access to services is often seen as a rural trade-off, being the “price to pay” for living in the area.
- Central Coupar Angus is within the third most deprived decile for **health deprivation** (SIMD 2020)

National Outcome	We live in communities that are inclusive, empowered, resilient and safe			
Local Outcome	Coupar Angus is a more cohesive community, with sustainable assets and improved access to services and opportunities			
Year 1 Action	Who is the action carried out by?	Resources allocated	How impact will be assessed?	Timescale
Use social needs screening tool in Coupar Angus, in order to ensure seamless referral to sources of support across employability, welfare rights, education, rural transport and other relevant services	Child Poverty Working Group	Within existing resources	Referrals, employability outcomes and client financial gains	December 2022
Identify households most likely to suffer from Cost of Living Crisis and target tailored support packages across energy efficiency, welfare rights, employability and other local supports	Multi-disciplinary locality team	To be determined	Referrals, employability outcomes and client financial gains	December 2022
Develop foodshare initiative for Coupar Angus	Communities Service, Good Food Working Group	£100k Food Insecurity (22/23)	Food Co-operative established	March 2023

¹ Data zones are ranked from 1 (most deprived) to 6,976 (least deprived) according to the SIMD. Each SIMD decile **contains 10 per cent of Scotland's data zones**.

National Outcome	We live in communities that are inclusive, empowered, resilient and safe			
Local Outcome	Coupar Angus is a more cohesive community, with sustainable assets and improved access to services and opportunities			
Year 1 Action	Who is the action carried out by?	Resources allocated	How impact will be assessed?	Timescale
Undertake Community Asset Review for Coupar Angus to ensure facilities are being used as effectively and efficiently as possible	Multi-disciplinary locality team	Within existing resources	Asset Review completed and recommendations made	December 2022
Provide key outreach services to the local community through a combination of in-person, mobile and digital services, including seamless referrals	Multi-disciplinary locality team	Within existing resources	Number of additional services being delivered	March 2023
Facilitate improved collaborative working between community groups in the town and support volunteering	Strathmore Stronger Communities	Within existing resources	New Community Action Plan developed	March 2023
Develop local work experience opportunities in Coupar Angus and wider Strathmore	Local Employability Partnership / DWP		Number of new opportunities created	March 2023

CRIEFF SOUTH

Crieff is an historic town and the largest settlement in the Strathearn Multi-Member Ward, with a population of 7,280 (2020 mid-year estimate). Crieff is situated 18 miles west of Perth, along the A85 trunk road and is the main service centre for the area. Crieff is a historic burgh, prominent in local and Scottish history. Crieff South occupies the area to the south and east of the town centre and main roads.

- Crieff South Datazone 2 is within the most deprived decile for **health deprivation** (SIMD 2020)
- Crieff South Datazone 2 is within the most deprived decile for **income deprivation** (SIMD 2020)
- Crieff South Datazones 2 and 4 are within the third most deprived decile for **education deprivation** (SIMD 2020)
- Crieff South Datazones 3, 4 and 5 are within the third most deprived decile for **employment deprivation** (SIMD 2020)

- Collectively, Crieff South has a significant majority of households (65%) classed as “financially stretched” or “urban adversity.” This compares to 32% for Perth and Kinross as a whole (ACORN 2019)
- Outside of Perth City and Rattray, Crieff South has the greatest number of families **receiving tax credits**, which is an indicator of low income
- The **unemployment rate** in Crieff South is 9.6%, compared to 13.67% in Perth City and 4% in Highland Perthshire
- The **Income Deprivation Rate** (IDR) over the past three years in Crieff South (16%) is higher than any other area of Perth and Kinross outside of Perth City and Rattray. This, combined with the higher unemployment levels, suggests concentrations of poverty driven by low pay. For comparison, the IDR in Crieff North is 5%

National Outcome	We live in communities that are inclusive, empowered, resilient and safe			
Local Outcome	South Crieff is a more cohesive community, with sustainable assets and improved access to services and opportunities			
Year 1 Action	Who is the action carried out by?	Resources allocated	How impact will be assessed?	Timescale
Obtain lived local experience of the top 3 inequalities in South Crieff	Multi-disciplinary locality team	£250 to cover expenses	Number of individuals involved	September 2023
Mapping exercise of existing service provision in South Crieff	Multi-disciplinary locality team	Within existing resources	Mapping exercise completed and next steps agreed	September 2023
Mapping exercise of existing community-led activity in South Crieff	Multi-disciplinary locality team	Within existing resources	Mapping exercise completed and next steps agreed	September 2023
Mapping exercise of buildings and assets in Crieff	Multi-disciplinary locality team	Within existing resources	Mapping exercise completed and next steps agreed	September 2023

OUR STRATEGIC PRIORITIES – ENABLING ACTIONS

During the review process, the Community Planning Partnership has identified a series of enabling actions (set out below) that we need to deliver in order to improve:

- **Community participation and co-production of services** – involving service users in the design and delivery of services brings improved outcomes for communities
- **Locality partnership working** – moving from a centralised model of service delivery, to one which is more reflective of local contexts delivers better services and improved outcomes for communities
- **Data sharing** – evidence led service design and delivery produces better quality and more relevant services. Partners sharing appropriate data to inform decision making is necessary to achieve the best outcomes
- **Risk Management** – develop a risk profile for the delivery of the LOIP to be monitored by the CPPEOG and reported to the Board

Action	Key Improvement Measure	Resource requirements	Timescale
Implement participative processes to ensure communities influence service delivery in relation to the five strategic priorities	Number of service users involved in service planning	Small discretionary fund to cover expenses	March 2023
Implement a multi-disciplinary approach to tackling our strategic priorities at a locality level	Delivery of accelerated locality working in two localities	Within existing resources	March 2023
Commission joint training and CPD for CPP staff in relation to the five strategic priorities, as well as the climate change and cost of living crises, to support signposting and a general foundation of support. Training will be provided on the basis of the poverty and mental and physical wellbeing priorities.	<ul style="list-style-type: none"> • Number of training sessions provided • Number of CP staff trained • Number of interactions with key messages on social media 	Within existing resources	March 2023
Produce clear and consistent communications around key services in order to make it easier for individuals and families to access the services they need	Number of communications campaigns delivered	Within existing resources	March 2023
