

Unplanned Admissions P&K residents by age group comparison of 2016/17 v 2017/18 EOY Projection – Data from Track Care.

The graphs below demonstrate that there is no significant changes in the level of unplanned admissions or changes in the numbers within the different age bands. The median value of Length Of Stay has no significant changes over the same period (the median value is the typical value as opposed to the average which can be greatly increased due to the influence of high value outliers)
