

Summary of comments seeking changes to the Proposed Action Programme

| Summary of comment | Received from | PKC response | Change to be made |
|--|--|--|--|
| In the Infrastructure Requirements for Perth section [of the LDP, page 253], there is an undertaking for the 'Preparation of a comprehensive Transport Strategy including infrastructure, services and funding mechanisms'. TACTRAN wishes to be consulted on the development of a transport strategy for the Perth city area to ensure that it reflects the aims and objectives of the statutory Regional Transport Strategy. | TACTRAN 0057/01/025 | Shaping Perth's Transport Future is the Comprehensive Transport Strategy referred to in page 253 of the Plan. No change is needed to the Proposed Action Programme as TACTRAN are already participants in this project. | No update is needed to the Action Programme. |
| All cases of 'Historic Scotland' should be amended to 'Historic Environment Scotland' to reflect the name of the relevant body | Scottish Government 0451/01/011 | Agree; Action Programme will be updated. | Yes |
| In respect of proposal H228 and H342, amend list of partners to include Transport Scotland. Work is ongoing with regards to connections to the A9 [trunk road] at Aberuthven and Auchterarder. As such, it is requested that any applications coming forward at E29, E25, H228 and H342 are discussed with Transport Scotland as early as possible (pages 24 & 25). | Scottish Government 0451/01/022 | Agree to amend the list of partners to be consistent with other proposals in the area. | Yes |
| Amend the name of the 'A9 junction upgrade between Dunblane and Luncarty' project [on page 6] to 'Potential grade separation of junctions at Auchterarder; Blackford; and Broxden and Inveralmond, Perth' because work that will determine A9 junction upgrades between Dunblane and Luncarty is still ongoing. This project description may be misleading at this stage. | Scottish Government 0451/01/023 | Agree to amend the project description since the new wording is clearer. | Yes |
| In respect of proposal MU344, amend actions to remove 'Development proposal including phasing plan and archaeological investigation required' and instead note that planning permission for three retail units at land to west of Duchlage Farm (17/01918/FLL) is anticipated to be granted imminently'. And in relation to funding, the respondent requests that the Action | London and Scottish Developments 0548/01/004 | Action Programme will be updated to take account of recent planning consent (granted 7 Feb 2018). No change is needed to the requirement for a phasing plan and archaeological investigation since these refer to the whole of MU344, not just the areas with individual planning consents. | Yes |
