|                      |  |  |        | Comments | from Change | and Transforr | mation Board | This project is being reported as At Risk as there is a delay in approving the proposals for a Tayside Wide CPU in order for the project to commence. As a result the savings attached to this project are currently delayed, however savings within Catering are currently being identified. Due to the delay in the project commencing thus far it is not anticipated that the CPU will be operational any earlier than April 2020. |                                |   |                               |                              |                              |                                    |                    |  |
