

MOTION BY COUNCILLORS J DUFF AND C SHIERS

BOYS NEED BINS

This Council notes:

- Prostate cancer is the most common cancer in men. 1 in 8 men will be diagnosed, rising to 1 in 4 for Black men. As many as 69% of those treated with surgery may experience urinary incontinence as a result.
- 1 in 25 men aged over 40 will experience some form of urinary leakage every year.
- 1 in 20 men aged 60 or over will experience bowel incontinence in the UK.
- Men who need to dispose of their sanitary waste (including incontinence pads, pouches, stoma, catheter, colostomy, ileostomy waste by-products) often have no direct access to a sanitary bin in male toilets.
- A survey of men living with incontinence reveals that 95% feel anxiety due to a lack of sanitary bins in men's toilets for disposing of pads hygienically.
- Nearly one third of men surveyed have been forced to carry their own waste in a bag.

This Council believes:

- that men should be able to safely and hygienically dispose of incontinence products easily and with dignity wherever they go.
- that men who need to dispose of their sanitary waste should have direct access to a sanitary bin in male toilets.

This Council resolves:

- To review and consider provision of sanitary bins within facilities normally accessed by adults – both public and in council buildings ;
- To encourage other providers of public and workplace toilets in the Perth and Kinross area to make male sanitary bins available in their facilities;
- To support Prostate Cancer UK's 'Boys Need Bins' campaign.
